cyclic nucleotide-gated Ca++ channel protein CNG-3 - bovine
C;Species: Bos primigenius taurus (cattle)
C;Sacesion: A55251; 84936
R;Blel, M.; Zong, X.; Distler, M.; Bosse, E.; Kluqbauer, N.; Murakami, M.; Flurkwirzi, V. Proc. Natl. Acad. Sci. U.S.A. 9, 1305-13509, 1994
A;Title: Another member of the cyclic nucleotide-gated channel tamily, expirasional A5251; MUD:94224768; PMID:8170936
A;Tatus: nucleic acid sequence not shown
A;Scatus: nucleic acid sequence not shown
A;Status: nucleic acid sequence not shown
A;Title: Cloning and functional expression of a cyclic-nucleotide-gated channel from murative 368, 859-863, 1994

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence

Sequence 46624, Application US/09270767

Patent No. 6703491

GENERAL INFORMATION:
APPLICANT: Homburger et al.
TITLE OF INVENTION: Nucleic acids and proteins of Drosophila melànogaster
FILE REFERENCE: File Reference: 7326-094
CURRENT APPLICATION NUMBER: US/09/270,767

CURRENT PILING DATE: 1999-03-17

NUMBER OF SEQ ID NOS: 62517

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 46624

LENGTH: 256

Sequence 6615, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF;
FILE REFERENCE: CLOO1307

CURRENT APPLICATION NUMBER: US/09/949,016

CURRENT FILING DATE: 2000-04-14

PRIOR FILING DATE: 2000-10-20

PRIOR FILING DATE: 2000-10-20

PRIOR FILING DATE: 2000-10-3

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-09-08

NUMBER OF SEQ ID NOS: 207012

SOFTWARE: PastSEQ for Windows Version 4.0

No. is the number of results predicted by chance to have a Acore greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 19,

Sequence 2, Application US/11128572

Publication No. US20050266513A1

GENERAL INFORMATION:

APPLICANT: Boehringer Ingelheim International GmbH

TITLE OF INVENTION: Method for identifying compounds that have the potential to 1nhib;

TITLE OF INVENTION: activity of Myc

FILE REPERENCE: Case 12-0211-PCT

CURRENT APPLICATION NUMBER: US/11/128,572

CURRENT FILING DATE: 2005-05-13

NUMBER OF SEQ ID NOS: 2

SOFTWARE: Patentin version 3.1
